<b>Further remarks on the consideration of SDGs</b>	-
<b>Rationale behind classification according to SFDR</b>	<p>Article 8</p> <p>The fund promotes the following characteristics: - Environmental characteristics which include reduction of GHG emissions and environmental responsibility. - Social characteristics which include labour rights, human rights, public health, inclusive employment, community engagement and supply chain responsibility. Environmental and social (E/S) characteristics are promoted by investing in line with the DNB Group Instructions for Responsible Investments (Group Instructions). This involves the exclusion of companies that violate our product and norm-based criteria, including human rights and employee rights, and cause significant environmental damage. The fund does not invest in companies that are in breach of the UN's Global Compact and the OECD's guidelines for multinational companies, companies that derive a large part of their income from the extraction of oil sands and/or thermal coal or base a large part of their business on thermal coal, or companies with exposure to controversial weapons. The fund excludes companies that produce cannabis for recreational use, tobacco and pornography. The fund does not use a benchmark that is aligned with the environmental and social characteristics promoted by the fund.</p>

<b>Best-in/of-Class</b>	No
<b>ESG-Integration</b>	<p>Yes</p> <p>Emphasis is placed on environmental, social and governance (ESG) factors in the investment process. The Investment Manager considers ESG risks and opportunities as part of the valuation of the companies where the Sub-Fund is investing in. ESG data is incorporated into the Investment Manager's portfolio management systems and is available to all of investment professionals. Our portfolio managers use this data in their company risk assessments, financial modelling, and investment decision making. The availability of this data in the front office system also often acts a flag for the portfolio managers, triggering further investigation and discussion with the Investment Manager responsible investment team regarding potential risks and opportunities and the financial effect from this. These discussions may trigger actions such as further investigation, engagement in dialogue with the company, or impact on the investment decision.</p>
